

Underwriting

SNL iPartners' easy-to-use, intuitive solution enhances the decision-making process for the management team, allowing them to retrieve and analyze valuable data quickly without traditional reporting restraints and interactive tools. By delivering powerful analytics to support solid business strategies, firms can leverage SNL iPartners' solution to gain an edge in today's competitive marketplace.

Retrieve Key Data. Produce Quantifiable Outcomes.

The data generated from your processing systems holds valuable information. A strong grasp of this information helps build a stronger and more profitable risk portfolio. Flexible and timely access to data facilitates the crucial understanding of risk characteristics within a line of business. This understanding is critical to producing pricing strategies that maximize profitability, growth and success.

- Monitor market acceptance, pricing and loss ratios
- Quickly identify trends
- Drill down to details by product, territory or risk type
- Quantify key outcomes
- Display information in distinguishable, easy-to-read formats

SNL iPartners' Insurance Scorecard puts information at your fingertips through an intuitive user interface that allows underwriters and managers access to up-to-date premium and loss information without IT intervention. Set your own alerts and be notified of thresholds, identify acceptable risks and recognize trends such as the frequency, duration and outcome of claims in an industry or class.
